PMI, PMP and PMBOK are registered marks of the Project Management Institute, Inc.

## Program Overview

This 4 day course is aimed at providing the participant with a complete understanding on project management as described by the Project Management Institutes' (PMI)® *A Guide to the Project Management Body of Knowledge (PMBOK® Guide) 5th Edition*. Participants are immersed in sample questions used in the PMP Exam as well as how to tackle these questions. A mock exam is also provided to simulate the exam environment and assess the level of preparedness of the participant. However, unlike other review courses, the PMP Review Course also tackles project management from a real-world view rather than just focusing on the PMP Exam. Concepts and project scenarios are used in a group setting to simulate real world application of project management. Not only will the participant be prepared to take on the PMP Exam, he will also become a better project manager – which is the bottom line of what organizations really need.
