

# Agile Shift

## Course Outline

## Program Overview

Organizations today are constantly under threat from tech-enabled and tech-centric market disruptors. New competitors, and transformed existing ones, can develop and deliver products much faster, without the limitations of cumbersome processes and silo-ed working practices. Despite the desire of public and private sector organizations to move to leaner and more agile ways of working, many struggle. Most agile delivery teams find themselves constrained by the traditional ways of working employed by other departments and teams.

**Agile SHIFT** is a new framework and certification developed by AXELOS, the custodians of ITIL and PRINCE2. It is a new way of delivering transformational change which promotes lean and agile across the entire organization, from senior management to delivery teams, to marketing and sales.

## Who is Agile SHIFT for?

Agile SHIFT is vital for any organization involved in the development or delivery of products and services. This could include the delivery team, marketing, sales, HR, finance or more operational roles to name a just a few.

What differentiates Agile SHIFT from other “Agile” products, frameworks and methods?

Until now the industry has largely focused transformation efforts only on those teams who directly contribute to the delivery of a product or service, such as an IT development team.

Supporting teams who form the wider organizational picture (and are critical to delivery to the end-customer), such as sales, marketing and finance, are left behind. If the whole organization is not aligned on the transformational change journey, it will fail to survive. Coupled with the move from a tech-supported, to a tech-centric market, today few product or service deliveries are solely IT. To focus only on IT will limit the chance for an organization to succeed.

Agile SHIFT removes the IT delivery focus from Agile and is easily accessible to any function or team across an organization.

## What else makes Agile SHIFT unique?

- A holistic approach, including proven concepts from all the major frameworks and techniques in the market
- Both a bottom-up and top-down approach to adopting agile
- Focused on changing the culture of an organization over implementing process and technology.

## What are the benefits of Agile SHIFT?

- Agile SHIFT helps organizations work more efficiently and maximize early and ongoing delivery of value so they can survive the transition of business and society from tech-supported to tech-enabled and tech-centric.
- In short, Agile Shift will enable your organization to survive in an ever-increasing competitive marketplace.

## How can I get involved with Agile SHIFT?

Agile Shift is planned to launch in Q1 2018. AXELOS is currently in the process of developing and testing the initial Foundation level training course.

We are planning to launch Beta Programs in November in Delhi and Manila in conjunction with Axelos. The training would be delivered by consultants from Axelos. To know more about attending, please contact

## In Philippines

- Unit 1602 Cityland 10 Tower 2 6815 HV dela Costa cor Ayala Ave, Makati City, Philippines
- Unit 2604 26th floor Raffles Corporate Center F. Ortigas Jr. Rd. Ortigas Center, Pasig City, Philippines
